ROTALK NEWS Episode 4 ROTAX's 915iS-powered Aquila A211 test aircraft, the Scheibe SF-25C Falke (first-ever 912-equipped aircraft!) and ROTAX factory in Gunskirchen, Austria.

~~912 The Engine For Construction~~

These are the characteristics of the 912: Air-cooled 3-, 4-, 5-, 6-cylinder naturally aspirated in-line-engines. Direct injection. Advanced injection and combustion system. PTOs via gear, V-belt and crankshaft. Extremely compact design. High torque at low speeds. Modular system with single cylinder arrangement and high degree of parts commonality.

F 3 L 912 . Air-cooled 3-cylinder naturally aspirated engine in inline arrangement. Low noise emissions due to acoustically optimized components with very smooth running and high durability. Easy, inexpensive installation due to minimum weight and small installation space. Best cold starting performance even under extreme conditions.

~~Hydrema 912 Specifications & Technical Data (1999-2002)...~~

O-200 vs Rotax 912 costs. It's just a personal opinion but I think the 0-200 is more likely to reach TBO due to its lower compression, lower RPMs, lack of a gearbox, and heavier construction. On the other hand, the 0-200 is a heavy engine, drinks gasoline, and is not as well suited for todays smaller light sport aircraft as is the 912.

~~913. The engine for construction equipment.~~

General Information of Deutz F3L912 Construction Engine: Engine Model: F3L912: Engine Type: 3 Cylinders in Line: Displacement: 2.828 L: Bore*Stroke(mm) 100 * 120: Compression Ratio: 17:1: Direction of Rotation (facing the fan end) Clockwise: Net Weight (with flywleel & alternator) 275 Kg: Overall Diemension(L*W*H) 700mm*679mm*821mm

~~Rotax-Owner.com—O-200 vs Rotax 912 costs~~

Pelican Parts Forum! I think Porsche limited the output of the 912 because they wanted to sell more 911's. For example, the 356 Carrera 2 put out something like 130-140 stock. Granted I have no idea how reliable the Carrera 2 is/are, but I think one could reliably build a stock 616 engine up to similar performance measures just...

~~Deutz F2L912(27HP) Construction Engine | Construction...~~

In production form, the Type 912 combined a 911 chassis / bodysell with the 1.6L, four-cylinder, push-rod Type 616/36 engine, based upon the Type 616/16 engine used in the Type 356SC of 1964-1965. With a lower compression ratio and new Solex carburetors, the Type 616/36 engine produced five less horsepower than the 616/16, but delivered about the same maximum torque at 3,500 rpm versus 4,200 rpm for the 616/16.
