The data in current edition of the Catalogue of Life have been provided by 164 resources. Most datasets include one or more global species database sectors (GSDs), i.e. datasets being developed to cover all of the world's species in a particular group of organisms. The datasets result from collaboration and editing by many expert taxonomists, whose names are found in the datasets themselves.

Catalogue of Life - 2020-09-01 Beta : Source databases

It is part of ETI's World Biodiversity Database. The full database is published on CD-ROM (ISBN 3-540-14673-3), and includes a fully illustrated multiple-entry key, a picture key, interactive distribution maps, and a special database treating larval development for most species.
