Surhan Gas Chemical manages the supplementary exploration and field development of Mustakillikning 25 yilligi as per the Production Sharing Agreement (PSA). Surhan Gas Chemicals OC. RU.

Surhan Gas Chemical OC

Shurtan is already highly mature, with gas reserves more than 75% depleted. Gas sales have fluctuated between 1,000 mmcf/d and 1,800 mmcf/d since the early 2000s, based on Uzbekistan's domestic and export demand dynamics. A large gas processing plant (Shurtan GPP) and petrochemical complex (Shurtan Gas Chemical Complex, SGCC) are operational. The GPP receives gas from Shurtan and serves as a hub for Uzbek production.

Shurtan Area Report | Wood Mackenzie

By Kamila Aliyeva. The National Holding Company (NHC) Uzbekneftegaz plans to implement a project to expand the production capacity of Shurtan Gas Chemical Complex (GCC). Currently, the complex is producing polyethylene in the amount of 75,000 tons per year, a representative of the holding told Trend. "The capacity of Shurtan GCC for the production of polyethylene amounts to 125,000 tons, by the end of the project, at the end of 2019, it will increase up to 200,000 tons," the source said.

Uzbekistan to expand capacity of Shurtan gas chemical complex

Shurtan Gas Chemical Complex, affiliated to Uzbekneftegaz, was commissioned in 2001 within Shurtan gas condensate field with an annual processing capacity of: feed gas — up to 4 bcm; natural gas for consumers — up to 3.5 bcm; pellets — above 125 ths. tons; liquefied gas — above 110 ths. tons; gas condensate — above 90 ths. tons and granulated sulfur — above 1 ths. tons. Polyethylene processing and production of pipes and fittings for gas pipelines with a capacity of 2.5 ths. tons ...
