### Neural Networks and Learning Machines

Haykin's book is probably the most comprehensive compendium of traditional neural network theory currently available. I say "traditional" because historically neural networks developed within the field of computer science, only loosely inspired by actual neuroscience.

### Solution Manual for Neural Networks and Learning Machines ...

This collaborative work presents the results of over twenty years of pioneering research by Professor Simon Haykin and his colleagues, dealing with the use of adaptive radar signal processing to account for the nonstationary nature of the environment. These results have profound implications for defense-related signal processing and remote sensing.
