### **What Is a Highly Sensitive Person? (A Relatable Guide ...**

A highly sensitive person (HSP) experiences the world differently than others. Due to a biological difference that they're born with, highly sensitive people are more aware of subtleties and process information deeply. This means they tend to be creative, insightful, and empathetic, but it also means they're more prone than others to stress and overwhelm.

### **Highly Sensitive Person | Psychology Today**

HSP, shorthand for "highly sensitive person," describes 15 to 20 percent of the population. Being sensitive is a normal trait--nothing defective about it. But you may not realize that, because society rewards the outgoing personality and treats shyness and sensitivity as something to be overcome.

### **The Highly Sensitive Person: How to Thrive When the World ...**

Highly sensitive people have reactions to criticism that are more intense than less sensitive people. As a result, they may employ certain tactics to avoid said criticism, including people-pleasing (so that there is no longer anything to criticize), criticizing themselves first, and avoiding the source of the criticism altogether, according to Aron.
